

XAERUS®
LUBRICATION/INNOVATION®

HIGH PERFORMANCE AIR COMPRESSOR LUBRICANTS

Xaerus Chemists and Engineers are recognized globally as experts in development and application of the most advanced and reliable compressor lubricants by compressor OEM and design engineers. This industry knowledge and experience supported with World Class application engineering and technical service makes Xaerus the logical choice for factory fill and aftermarket supply. Our products cover all compressor types (rotary screw, rotary vane, reciprocating and centrifugal).

Product Features

- Extremely low water content
- Ashless formulation
- High viscosity index and low power point
- Rust and corrosion protection
- Excellent thermal and oxidative stability
- Completely demulsible
- Resist solid formulation
- Low volatility / high auto ignition temperature
- Low sludge and varnish formulation

Potential Benefit

- Maximum bearing, cooler, and equipment life, minimizing maintenance cost
- Improve oil cooler efficiency
- Improved system cleanliness with minimal solid formation
- Better oil flow and less wear at start up
- Wide operating temperature range
- Minimal vapor phase oil carryover to downstream equipment
- **Fully Compatible to Replace OEM Oils**

PRODUCT	TYPE	RUNNING HOUR	COMPRESSOR TYPE
XA 241 Series	Hydrotreated GP II/ Synthetic Blend	4000	Rotary, Screw
XA 101 Series	Full PAO Synthetic	8000	Rotary, Screw
XA 442 Series	Full PAG / POE Synthetic	8000	Rotary, Screw
XA 829 Series	Full Diester Synthetic	8000	Reciprocating
XAF 110 Series	Food Grade Sythetic 	6000	Rotary, Screw
XA 825-46	Air Compressor Cleaner	250 to 500	Rotary, Screw

Product Packaging

1 gal : 3,79 liter

5 gal : 18,9 liter

55 gal : 208 Liter
